## 8 Strip PCR Tubes 0.2ml With Individual Attached Caps

The 0.2 ml 8-Strip PCR Tubes with individually attached caps are reinforced to resist bending while handling these tubes. Individually attached domed caps are easy to handle and help avoid cross-contamination.

Polypropylene thin-walled PCR tubes give a rapid and even heat transfer for reliable amplifications.

They are manufactured in clean room conditions and certified to have detectable levels of DNase, RNase, DNA, and PCR inhibitors. These PCR tubes with domed caps were tested to be pyrogen-free and non-autofluorescent.

These thin-walled tube strips with attached caps are ideal for many researchers. If they want something high-quality and able to withstand anything for their research purposes, they can get these tubes.

### Highlights:

Made and created from medical grade polypropylene.

Attached caps eliminate the possibility of cross-contamination through accidental tube–cap mix-up.

Comes with a PCR inhibitor-free.

It is certified for RNase, DNase, DNA, and Pyrogen-free.

It has ultra-thin walls, ensuring efficient thermal transfer and maximum yield.
